EDILTECO AT BAU 2025: INNOVATIVE SOLUTIONS FOR CONSTRUCTION

Edilteco successfully participated in BAU 2025 in Munich, one of the most prestigious international events for construction industry professionals.

Edilteco at BAU 2025: Efficient and Innovative Construction

Edilteco's participation in BAU 2025 further strengthened the company's role as a key player in the construction sector. The event, held from January 13 to 17, 2025, featured over 2,000 exhibitors and approximately 200,000 visitors, confirming its status as an outstanding platform for **exchanging ideas and technologies**.

BAU is recognized as one of the most influential fairs in Europe and globally, a key venue where the future of construction is shaped, with an increasing focus on **sustainability and energy efficiency**. Edilteco seized this opportunity to showcase its innovative solutions designed for lightweight, efficient, and high-performance construction.

Edilteco highlighted two products already well-known in the German market: Isolcap XX 500 and Protherm Light. Both products attracted significant interest from visitors thanks to their high performance and versatility.

Isolcap XX 500: lightweight screeds and substrates

- **Features:** lightweight premix based on cement and expanded polystyrene, ideal for screeds and substrates.
- **Benefits:** provides excellent thermal insulation, quick installation, and an excellent strength-to-weight ratio, effectively meeting the needs for lightness and insulation.

Protherm Light: plaster for passive fire protection

- **Features:** lightweight plaster specifically designed for passive fire protection, offering high performance in terms of resistance and safety in case of fire.
- **Benefits:** in addition to enhancing building safety, it provides good thermal insulation and excellent mechanical resistance, addressing the dual need for protection and performance.

A confirmed success

Edilteco's participation in BAU 2025 was a **significant opportunity** to strengthen its position in the international market and demonstrate its commitment to innovation and sustainability. With products like Isolcap XX 500 and Protherm Light, the company was able to meet the new challenges of the industry, positioning itself as the **ideal partner for modern and responsible construction**.
